NAMISENS

Metal identification in a nutshell

MAGNETIC SPECTROSCOPY WITH MAXIMAL MOBILITY

acquati group

www.acquatigroup.com

a burster Italia product division

burster

Place it on the alloy you want to identify and immediately receive the result !

Quick and efficient

The measurement, calculation and **identification of the alloys** take place in fractions of a second

Safety

Metal **identification using magnetic spectroscopy** without harmful x-radiation

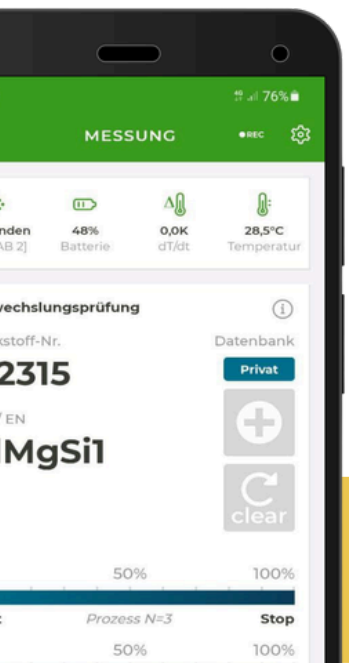

Signalization

Feedback given by LED ring and acoustic signal

Mobile

Complete control with and without the Smartphone App

Easy to operate

The ergonomic one-button operation enables intuitive and fast measurement, even with gloves

Non-destructive measurement

Certified measurement to traceable calibration standards
